

AGIVA GROUTMASTER 150/300

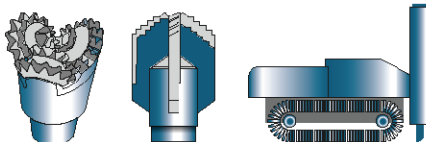

Description

The Agiva Groutmaster 150/300 consists of a colloidal mixer, a buffer tank with agitator and a worm pump. This ensures that homogeneous mixtures can be produced, even for products which are difficult to mix. Thanks to the 300-liter buffer tank, a large volume of grout can be created before the hole needs to be filled.

Weight: ± 850 kg

Dimensions:

- Height: 1 600 mm
- Width: 800 mm
- Length: 2 200 mm

Technical specifications

Electric version

Turbo mixer:

- Capacity: 150 liters
- Max mixing capacity: 7 m³/h
- Debit vertical pump: 600 l/min
- Power: 5,5 kW

Buffer tank:

- Capacity: 300 liters
- Mix speed: 30 rpm
- Power: 2,2 kW

Rotor – Stator pump:

- Max. pressure: 26 bar
- Flow: 9 m³/h
- Power: 5,5 kW

Accessories:

- 20 m of hose
