

AGIVA GROUTMASTER 1000/1500

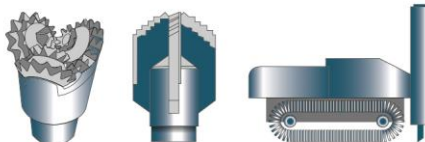

Description

The Agiva Groutmaster 1000/1500 consists of a colloidal mixer, a buffer tank with agitator, and a screw pump. This ensures that homogeneous mixtures can be made, even for difficult-to-mix products. With a 1500-liter buffer tank, a borehole can be filled in one go.

Weight: ± 2,900 kg

Dimensions:

- Height: 2,400 mm
- Width: 2,000 mm
- Length: 3,000 mm

Technical Specifications

Electric version

- **Turbo Mixer:**
 - Capacity: 1,200 liters
 - Max mixing capacity: 7.2 m³/h
 - Vertical pump flow rate: 2,500 l/min
 - Power: 15 - 22 kW
- **Buffer Tank:**
 - Capacity: 1,750 liters
 - Mixing speed: 30 rpm
 - Power: 2.2 kW
- **Rotor-Stator Pump:**
 - Max. pressure: 26 bar
 - Flow rate: 9 m³/h
 - Power: 7.5 kW
-

DELIVERY CONDITIONS AND PAYMENT TERMS

- **Delivery address:** EXW – Ex Works Agiva International, Eeklo
- **Payment:** 100% upon delivery
- **Prices:** In Euro, excluding VAT
- **Warranty:** 1 year after delivery
- **Confidentiality:** This document is intended solely for the addressed recipient. The information contained herein or any attached technical documents may not be reproduced or disclosed to third parties. Breaches may result in criminal prosecution.

This product is designed for heavy-duty applications where high performance and reliability are required, such as in construction or mining. It provides an efficient solution for mixing and pumping difficult products.
